STEEL & ALLOYS

CATALOGUE

Strength. Reliability. Global Reach.
Building a Stronger Tomorrow, Together.

OEM BASED

Customized solutions
as per your brand
and specifications.

PREMIUM QUALITY

Superior quality
products for
maximum durability.

TIMELY DELIVERY

Committed to
on-time delivery,
every time.

LOWEST RATE

Lowest rate in
the industry
guaranteed.

GLOBAL EXPORT

Proudly exporting
worldwide with
trusted partnerships.

STRONG PARTNERSHIPS. STRONGER FUTURE.

ABOUT US

Welcome to Seven Seas Global Pvt. Ltd., a trusted name in the industry for high-quality products that cater to diverse needs.

With a foundation built on excellence and customer satisfaction, we have established ourselves as a leader in delivering superior products that make a significant difference in everyday life.

Our commitment to quality and innovation drives us to continuously improve and expand our offerings, ensuring that we meet the evolving needs of our customers.

As a reputed manufacturer and exporter from India with over 25+ years of experience with partners, we have been exporting to East Africa, South Africa, Australia, Saudi Arabia, Oman, European Countries, etc. At Seven Seas Global Pvt. Ltd., we pride ourselves on our Innovative Designs, Most Competitive Prices, Timely Delivery, and Commitment to Supply the Best Quality Materials.

These Unique Selling Points set us apart from our competitors and ensure that our customers receive products that meet their highest expectations.

We continuously invest in research and development to bring innovative solutions to the market, addressing the changing demands of our diverse clientele.

TMT BARS (U-BEND)

Strength | Flexibility | Durability

Our U-Bend TMT Bars, Thermo-Mechanically Treated for superior strength and flexibility, ensure precise reinforcement and optimal load distribution in structural frameworks, enhancing stability and durability for both residential and commercial construction projects.

HIGH STRENGTH

Engineered for maximum strength and reliability.

FLEXIBILITY

U-Bend design ensures better flexibility and fit.

PRECISE REINFORCEMENT

Ensures accurate reinforcement and structural integrity.

OPTIMAL LOAD DISTRIBUTION

Improves load distribution and overall stability.

DURABILITY

Built to last with corrosion-resistant performance.

APPLICATIONS

- ✓ Residential Buildings
- ✓ Commercial Complexes
- ✓ Bridges & Flyovers
- ✓ Industrial Structures
- ✓ Infrastructure Projects

U-BEND DESIGN

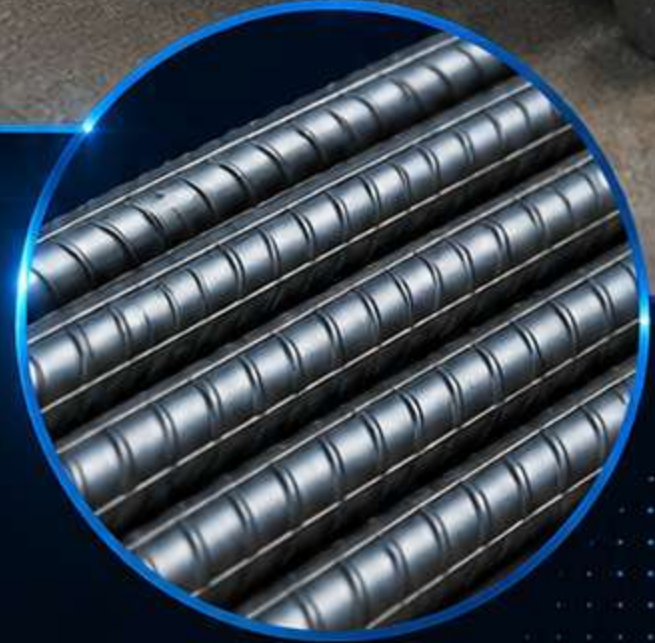

Perfect Bend.
Perfect Strength.

TMT RIBBED BARS (STRAIGHT)

Our high-strength TMT Ribbed Bars, designed with ribbed patterns for superior concrete bonding, provide exceptional strength, ductility, and load resistance, making them ideal for reinforcing concrete structures in various construction projects such as buildings, bridges, and highways.

PRODUCT HIGHLIGHTS

**STRONG
BONDING**

**HIGH
STRENGTH**

**EXCELLENT

ROUND BARS

Our **Round Bars**, renowned for strength and durability, offer exceptional tensile strength and high ductility, ideal for heavy load support and flexible design. Their superior anti-corrosion coating makes them perfect for residential, commercial, and infrastructure projects.

KEY FEATURES

HIGH STRENGTH

Built to withstand heavy loads and extreme conditions.

EXCELLENT DUCTILITY

Easy to bend and shape without compromising strength.

ANTI-CORROSION COATING

Enhanced resistance to rust and harsh environments.

PRECISE DIMENSIONS

Manufactured with exact tolerance for perfect fit.

LONG LASTING PERFORMANCE

Reliable and durable for years of consistent use.

FLAT BARS

STRENGTH IN EVERY EDGE.

Our **Flat Bars** offer exceptional strength and versatility, ideal for construction and industrial use. Available in various sizes, they can be precisely cut, welded, and shaped to meet your specific needs.

EXTRAORDINARY STRENGTH

Delivers high load capacity with excellent durability.

MULTI-PURPOSE VERSATILITY

Perfect for a wide range of industrial and construction needs.

CUSTOM FABRICATION

Easily cut, welded, and shaped for exact project requirements.

LONG-TERM RELIABILITY

Built to perform consistently in demanding conditions.

VERSATILE. RELIABLE. BUILT FOR THE FUTURE.

HEXA BARS

STRENGTH IN **EVERY ANGLE.**

Our **Hexagonal TMT bars** are engineered for superior concrete bonding, delivering unmatched strength and durability. Available in various grades and sizes, they provide reliable stability and performance for all construction projects.

SUPERIOR BONDING

Hexagonal shape ensures stronger grip with concrete.

EXTRA STRENGTH

High tensile strength for demanding structural use.

WIDE RANGE

Available in multiple grades and sizes.

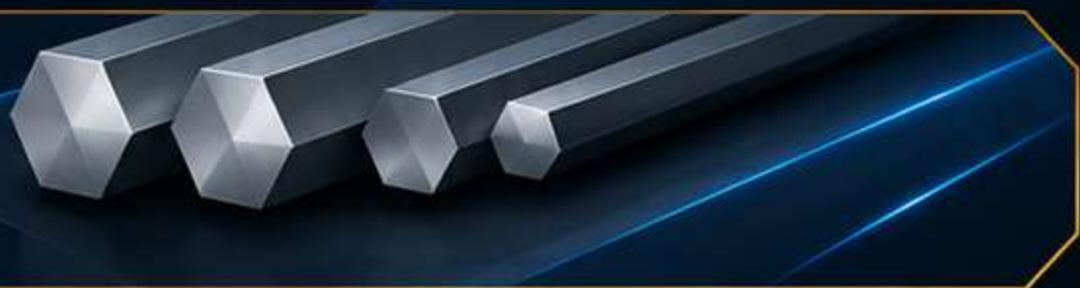

PRECISELY MANUFACTURED

Engineered with accuracy for perfect fit and finish.

MS ANGLES

SHAPING STRENGTH. **BUILDING TRUST.**

Our MS Angles, made from high-quality mild steel, provide exceptional strength and stability for construction and industrial use. Versatile and durable, they are ideal for frameworks, supports, and structural elements. Available in various sizes and thicknesses, they are easily cut, welded, and drilled to meet project needs.

WIDE RANGE

Multiple sizes & thicknesses to fit every need.

EASY FABRICATION

Simple to cut, weld, and drill on-site.

MULTI-PURPOSE

Suitable for structural, industrial, and fabrication use.

CORROSION RESISTANCE

Reliable in diverse environments and conditions.

CONSISTENT FINISH

Uniform quality for smooth and reliable performance.

PRECISION IN EVERY ANGLE.

MS WIRE ROD

Our precision-engineered wire rods, crafted through advanced rolling processes, are essential for diverse industries. They serve as the foundation for nails, fencing, wire mesh, and electrical cables, offering versatility and reliability for construction, automotive, and manufacturing needs.

BUILT TO **PERFORM**. MADE TO **LAST**.

BINDING WIRE

Our binding wire, made from high-quality steel, is essential for construction and packaging. Known for its flexibility, durability, and corrosion resistance, it securely binds reinforcing bars, construction materials, and packaged goods.

Available in various gauges and lengths, it offers a reliable and cost-effective solution for ensuring structural integrity and stability.

GI WIRE

Our galvanized iron (GI) wire, coated with a protective zinc layer through galvanization, offers enhanced corrosion and rust resistance. Ideal for construction, agriculture, fencing, and electrical applications, it combines strength and durability for reliable performance in outdoor and harsh environments.

Versatile and long-lasting, it ensures superior performance across various industrial and domestic uses.

MS PIPES

Our MS pipes, made from premium grade mild steel, are engineered for strength, durability, and versatility. Ideal for structural, mechanical, and general engineering applications, they offer excellent weldability, corrosion resistance, and high load-bearing capacity.

Available in various sizes and thicknesses, our MS pipes ensure reliable performance in construction, infrastructure, water supply, and industrial projects.

HIGH STRENGTH

Built to withstand heavy loads and harsh conditions.

DURABLE & RELIABLE

Long-lasting performance with excellent toughness and impact resistance.

CORROSION RESISTANT

Resistant to rust and corrosion for extended service life.

EASY TO FABRICATE

Excellent weldability and machinability for easy installation.

APPLICATIONS

- ✓ Construction & Infrastructure
- ✓ Water Supply Systems
- ✓ Mechanical Engineering
- ✓ Oil & Gas Industry
- ✓ Structural Applications

**BUILT FOR
PERFORMANCE.
MADE TO LAST.**

GI PIPES

**STRENGTH. SUPPORT.
BUILT TO LAST.**

Our GI pipes, made from premium grade galvanized iron, offer exceptional strength, durability, and corrosion resistance. Designed to deliver reliable performance in a wide range of structural and general engineering applications, they are the perfect choice for long-lasting results.

CORROSION RESISTANT

MESH WIRES

Our mesh wires, made from interlinked steel or aluminum strands, offer durability and flexibility. Available in various sizes and gauges, they ensure reliable performance and versatility for diverse construction, agriculture, and manufacturing needs.

DURABILITY

Built to withstand heavy loads and harsh conditions.

FLEXIBILITY

Easy to install and adaptable to various applications.

MULTIPLE SIZES

Available in various sizes and gauges to meet all needs.

RELIABLE PERFORMANCE

Ensures consistent strength and long-lasting results.

VERSATILE USE

Ideal for construction, agriculture, fencing, and manufacturing.

STRONG. FLEXIBLE. RELIABLE.
BUILT FOR EVERY NEED.

WIRE NAILS

Our wire nails, made from low-carbon steel, are designed for woodworking and construction. With sharp points and flat heads, they ensure easy driving and strong, durable connections.

Available in various lengths and thicknesses, they are ideal for a range of carpentry and DIY projects.

SHARP POINTS

Ensures easy penetration and secure hold.

STRONG & DURABLE

Provides reliable and long-lasting connections.

VARIOUS SIZES

Available in various lengths and thicknesses.

WIDE APPLICATION

Ideal for carpentry, construction, and DIY projects.

BUILT FOR STRENGTH.
MADE FOR EVERY PROJECT.

FACTORY IMAGES

Our well-equipped manufacturing unit is equipped with advanced machinery and modern technology to deliver high quality products.

PACKAGING

We use premium quality packaging material to ensure the safety and durability of our products during handling and transit.

CONTAINER LOADING

We follow a systematic and safe loading process to ensure timely delivery of our products to customers worldwide.

QUALITY CHECKING

Quality is our top priority. Each product undergoes strict quality checks to ensure it meets international standards.
